

## Join the National Veterinary School of Toulouse as a Lecturer in Emergency and Critical Care!

The National Veterinary School of Toulouse is recruiting a Lecturer in Small Animal Emergency and Critical Care.

### Your missions

- **Teaching:** Participate in the training of veterinary students and interns (lectures, tutorials, clinical activities) and in continuing education for professionals. If you hold a specialist diploma in Emergency and Critical Care, you will also have the opportunity to supervise residents;
- **Clinical:** Contribute to the operation of the Veterinary Teaching Hospital within a specialized and multidisciplinary team, working alongside students, interns, and residents;
- **Research:** Develop innovative research lines, particularly on anti-infective treatments for critically ill canine and feline patients through individualized therapeutic drug monitoring, with the support of an accredited research unit;
- **Collective engagement:** Contribute to the collective life by participating in ENVT committees and working groups.

### Profile sought

- **State diploma of Doctor of Veterinary Medicine** (or equivalent allowing practice in France).
- **University doctorate** (PhD or equivalent), or exceptionally a European or American specialist diploma in Emergency and Critical Care.
- **Former resident or diplomate of the European or American College in Emergency and Critical Care** (ECVECC or ACVECC), or alternatively significant experience in this field with willingness to undertake a residency program after recruitment.
- Passion for teaching, research, and teamwork.

## **What we offer**

The National Veterinary School of Toulouse is a center of excellence internationally recognized for the quality of its teaching and research activities. Located in Toulouse, a dynamic metropolis in southwestern France ideally situated between the Mediterranean Sea, the Atlantic Ocean and the Pyrenees, it offers a stimulating scientific environment within an attractive living setting.

The Small Animal Veterinary Teaching Hospital of ENVV is a modern and fully equipped facility including: digital radiography, fluoroscopy, ultrasound, CT scanner, access to high-field MRI (*off-site*), modern and fully equipped operating theater, comprehensive diagnostic and interventional endoscopy platform, echocardiography, digital ECG, Holter, full clinical pathology laboratory, infectious diseases and pathology services on site. Certified French or European specialists in internal medicine, feline medicine, emergency and critical care, anesthesia-analgesia, neurology, ophthalmology, clinical pathology, dermatology, clinical nutrition, pathology, and parasitology, along with dedicated technical staff, manage approximately 10,000 cases per year.

The Emergency and Critical Care service has a capacity of 14 intensive care hospitalization units and all equipment required for high-level specialized practice: multiple multiparameter monitors, advanced infusion devices, dedicated ultrasound, mechanical ventilation, high-flow oxygen therapy, hemodialysis, full point-of-care laboratory (biochemistry, hematology, coagulation including thromboelastometry - ROTEM®), and a blood bank with on-site blood product preparation.

Located just 15 minutes from the city center, ENVV benefits from a 53-hectare tree-lined campus with sports facilities, offering an exceptional working and living environment. The institution is part of a strong dynamic of research and innovation, with numerous inter-institutional collaborations, particularly with the local medical university, as well as leading organizations such as INSERM and INRAE.

Joining ENVV means becoming part of an academic environment of excellence, combining clinical expertise, scientific innovation, and quality of life, ideal for developing a high-level specialized, academic, and collaborative career.

## **How to apply?**

Submit your application today and join an institution that places excellence, innovation, and passion at the heart of its values.
